

Best observed activation edit by task

Highest success among seven edit arms · same 96 unseen scenarios per task

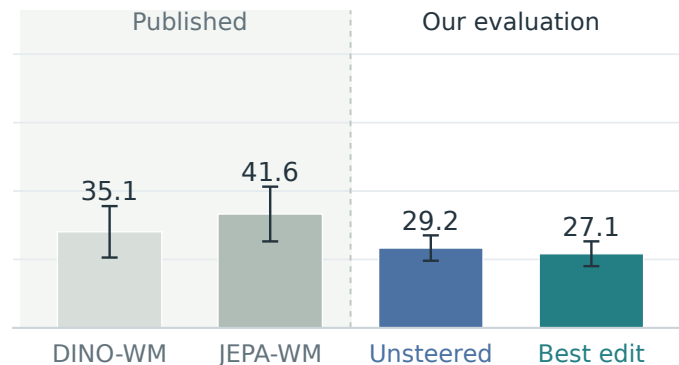

Reach

Four-direction / Visual-only (tie)

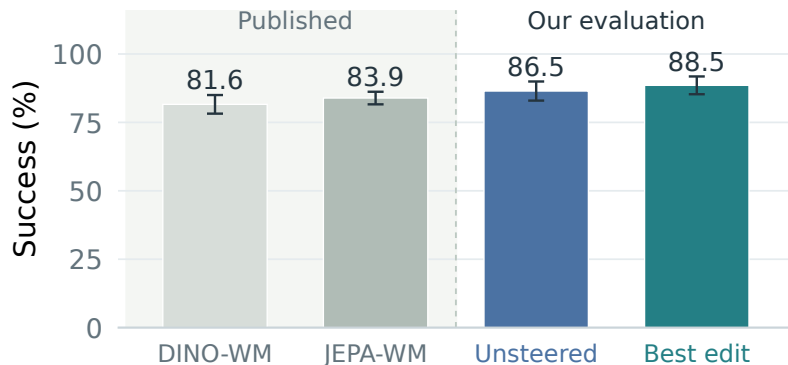

Reach-Wall

Random visual + action

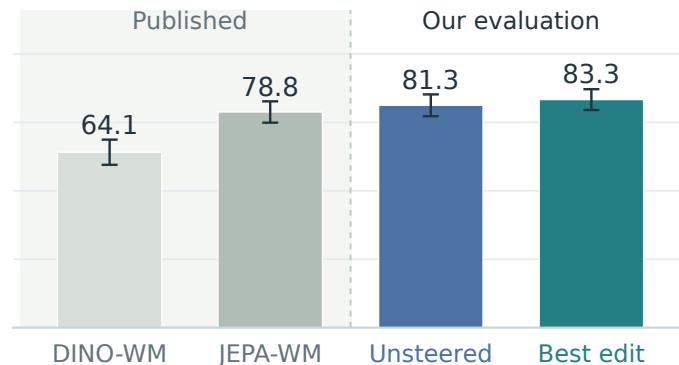

PointMaze

Four-direction

Wall

Equal-budget visual + action

Best edit = post-hoc taskwise maximum; not one fixed method. Winning edits are named above.

Error bars: published SD; local ± 1 episode SE, not adjusted for selecting the maximum.

Published models are external context. Full results retain all arms, ties and paired comparisons.
